SENIOR PRODUCT MANAGER | AI, FINTECH, BANKING & TELECOM | B2B & B2C

16+ Years Experience · 12+ Years Product Management · Chennai, India · Immediate Joiner · Open to Product, Services & Consulting Firms

Senior Product Manager with 16+ years across Telecom, Fintech, and Banking, including 12+ years in Product Management. At Verizon India, built and scaled two production AI platforms at once — a **B2C conversational AI chatbot** serving **8.3M+ retail customer sessions at 89% CSAT**, and a **B2B GenAI Agent Assist Platform** used daily by **2,000+ contact-centre agents** to cut Average Handling Time by 35%. Both shipped to production, not piloted. Equally comfortable owning hands-on delivery for my own squad and guiding Product Owners across others — from onboarding new POs into the Verizon ecosystem to orchestrating end-to-end retail customer journeys. Fintech and banking domain runs deep: payment certifications at FIS Global, a USD 15M digital banking platform at HCL. SAFe 6 POPM, CSPO, Anthropic AI Fluency, and Google AI certified.

WORK EXPERIENCE

AI Product Manager — Generative AI and Conversational AI Platform

Verizon India · Oct 2024 – Present · Chennai, India · Team: 5 Product Owners + Cross-Functional Squads

- **B2C — Customer Assist Chatbot:** Owned and scaled a conversational AI chatbot on Google CCAI for retail and contact-centre customers — 8.3M+ sessions, 89% CSAT, 79% deflection rate, 72% containment rate, 12.2% reduction in call-in ratio.
- **Built a product utilisation dashboard myself** using Claude Code, integrating usage and performance data from Google CCAI and GCP directly, to track adoption and KPI trends in near real time.
- **B2B — Agent Assist Platform:** Built and owned a GenAI platform for retail contact-centre agents — LLMs, agentic AI workflows, RAG pipelines — serving 2,000+ agents daily. 35% AHT reduction, 85%+ user confidence, 18% response quality improvement.
- Designed AI evaluation frameworks — offline golden-dataset validation and online production monitoring — to cut hallucination rate and lift model accuracy across both platforms.
- Led GenAI integration across enterprise data sources — chunking strategy, vector retrieval logic, confidence thresholds, data governance policy.
- Co-built an AI-powered user story generation tool using Gemini — cut story creation time by 90%, adopted org-wide.
- Set OKR and KPI frameworks connecting AI model behaviour to operational performance; built business cases for proactive AI features targeting sales conversion and call-in reduction.

Lead Product Owner — CX Platform and Digital Services Suite

Verizon India · Jul 2021 – Oct 2024 · Chennai, India · Team: 5 Product Owners + 3 Agile Squads

- **Owned hands-on product strategy and delivery for my own squad** while indirectly guiding 4 Product Owners across 3 other squads on prioritization and delivery quality — drove 75% automation of customer touchpoints within two delivery cycles.
- **Troubleshoot** platform migration from legacy infrastructure to an enterprise workflow platform in real time — resolved cutover and data-integrity issues — delivered on time, zero operational disruption, 30% less manual processing effort.
- **Mentored and onboarded new Product Owners** into the Verizon ecosystem — architecture, stakeholder landscape, and delivery rituals — shortening ramp-up time for new hires.
- **Orchestrated end-to-end customer journeys** and owned case management for retail journey edge cases — exceptions, escalations, and dispute flows — integrating voice automation to cut agent-handled queries by 25%.
- Grew platform scope from 40% to 100% coverage of customer touchpoints within three quarters; governed backlog across three Agile squads under SAFe at 90%+ sprint velocity.
- Ran competitor analysis informing the 2026 product roadmap — identified three high-impact feature gaps, seeding two new product initiatives.

Product Owner — Digital Banking and Lending Platform

HCL Technologies · Feb 2018 – Jul 2021 · Chennai, India | Sydney, Australia (Onsite) · Banking & Fintech

- Promoted from Business Analyst to Product Owner on a USD 15M Green Loan digital banking platform for Commonwealth Bank of Australia — delivered on schedule across two geographies, full regulatory compliance.
- On-site product anchor in Sydney, bridging offshore engineering in India with onshore business stakeholders — cut cross-team miscommunication incidents by 60%.
- Mentored and coached 10 intern Business Analysts to independent delivery capability within 90 days.

- Led REST API integration strategy for loan origination, credit decisioning, and disbursement workflows — cut integration support tickets by 40%.

Product Implementation Analyst — Payments and Cards

FIS Global · Mar 2016 – Feb 2018 · Chennai, India · Banking & Fintech

- Owned payment product delivery for Citibank Global — primary product interface for US-based stakeholders across debit card and ATM transaction processing programmes.
- Directed Visa, Mastercard, and China UnionPay certification programmes — zero failures across US, India, Singapore, and APAC markets, processing 2M+ card transactions post-certification.

Onsite Implementation Manager — Payments and Cards

Betamonks Technology Factory · May 2014 – Mar 2016 · Manila, Philippines | Singapore · Banking & Fintech

- Managed a 5-member delivery team across Development, QA, and Tech Operations — delivered Contactless EMV, cardless ATM, and Visa/Mastercard certifications for Southeast Asian banking clients.

Software Engineer / Requirement Analyst

Zylog Systems · 2011 – 2014 · Banking & Fintech

- Early-career engineering and requirements analysis on banking and fintech client engagements — gathered and translated business requirements into technical specifications.

Support Engineer

Suntech Systems · 2010 – 2011

- Started career in technical support — troubleshooting, ticket resolution, and customer-facing issue diagnosis.

KEY ACHIEVEMENTS

- 8.3M+ sessions · 89% CSAT · 79% deflection · 72% containment · 12.2% call-in ratio reduction — B2C Customer Assist Chatbot, Verizon India.
